One thought that comes immediately is when you have the permit ready for public draft. Please give advance time to ask Jim Harper to format this document with the table of contents linked to the items. This is a really really big help whenever anyone needs to refer to the permit - it is much easier without the scrolling.

George

Subject: C6 redline of draft permit

[attachment "C6 Resources Draft Permit R9UIC-CA5-FY09-1_C6 Resources.doc" deleted by George Robin/R9/USEPA/US]

Hi George,

Attached is the draft permit that Shell redlined with their suggested changes. I went through it and I have asked you **16** questions - items I am unsure about. All the redline changes are their proposed changes, so if I did not have a question, it means I agree with the change, but you may not.

15 of the 16 questions I have for you are on the text of the permit, and the last one is in the Appendix.

You can add your response or we can talk about your answer,s but at least you know what I am uncertain about.

Now I am going to do the same thing for their one page memo and forward that to you as well.

Thanks, Michele
